Year of the defense: 2010

Bachelor Thesis of title The Role of Nurses in managerial positions is composed in free parts: theoretical, empirical and attachments. It is aimed at clarifying the importance of the work of nurses in management positions. There are important factors related to the leadership and their connection of nursing management area in the theoretical part. There are results of research survey in the practical part which investigates with intensity of nurse's work who are working at lower and middle level of management, identifies not only problems but also the motivating factors of their work. The supplement is the entire text of the questionnaire and materials related to this topic.

The purpose of this work is also to highlight the work of nurses in managerial positions, which is very difficult, because they are an important interlink between the management of medical equipment and nurses at the lowest levels whose result of their work is evaluated by a satisfaction of the patient.

Keywords: management, nursing, motivation, communication, leadership, team, head nurse, charge nurse, stress, conflict, ethics, pretensions, roles.
